

## INTRODUCING A NEW MULTIFUNCTION MANUAL SLIDING DOOR SYSTEM

### MUTO

Coming soon ...

#### **Ease of operation**

Introducing MUTO, the new manual sliding door system from DORMA, designed to impress with an extensive range of features for enhanced ease of operation:

- Self-closing option
- Door position status indicator
- Damping mechanism (DORMOTION)

#### **Versatile solution**

MUTO manual sliding door systems provide multi-faceted solutions:

- Suitable for commercial grade wood and metal door panel or glass panel solutions with both light and heavy doors weighing from 110 lb to 440 lb
- Easily installed and adjusted, with a removable front cover
- Unparalleled design in multiple finishes; choose from aluminum, similar to satin stainless, or over 200 Custom RAL colors
- Synchro and telescopic models

## MUTO COMFORT

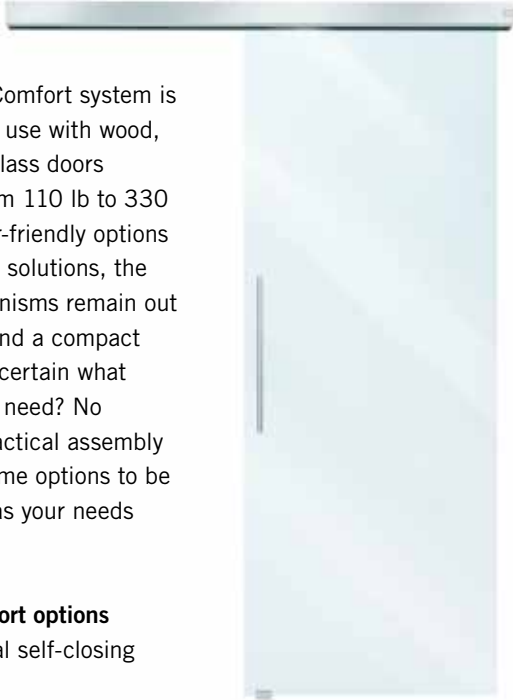

A versatile, multi-featured sliding door system, adaptable to changing needs

The MUTO Comfort system is designed for use with wood, metal, and glass doors weighing from 110 lb to 330 lb. With user-friendly options to customize solutions, the sleek mechanisms remain out of sight behind a compact header. Not certain what features you need? No problem. Practical assembly kits allow some options to be retrofitted\* as your needs change.

### MUTO Comfort options

- Mechanical self-closing action
- Door position status indicator connecting to your facility management
- DORMOTION damping mechanism; no glass preparation required

\* The status indicator and DORMOTION options can be retrofitted.

## MUTO BASIC

A simple, elegant sliding door system designed for wood doors

The MUTO Basic system is specifically designed for wood door panels, but clamps can be fitted to accommodate glass. MUTO Basic supports doors weighing from 110 lb to 440 lb.

Like the Comfort system, the mechanisms operating the door are all concealed behind an attractively compact header.

### MUTO Basic option

- DORMOTION, a damping mechanism that softens the door's final movement upon opening or closing. No glass preparation required.

### Cover finishes

- 150 Satin Anodized Aluminum

- 113 Anodized Similar to Satin Stainless

### Single Panel, Synchro, and Telescopic Systems

Both MUTO Comfort and MUTO Basic sliding door systems are available in three configurations:

- **Single panel**
- **Synchro** – the second door panel opens and closes automatically as the first one moves
- **Telescopic** – wide openings with small panels

Single panel

Double panel with/without Synchro

Double-panel, telescopic

### Installation

All MUTO systems can be wall or ceiling mounted. MUTO Comfort can be glass mounted as well.
